

■ Science Facts Book - Page 1

- Light travels at about 299,792 km per second.
- Octopuses have three hearts.
- A day on Venus is longer than its year.
- There are more stars in the universe than grains of sand on Earth.
- The Earth is approximately 4.5 billion years old.

■ Science Facts Book - Page 2

- Light travels at about 299,792 km per second.
- Humans share about 60% of DNA with bananas.
- The human brain uses about 20% of the body's energy.
- Lightning is hotter than the surface of the sun.
- A day on Venus is longer than its year.

■ Science Facts Book - Page 3

- Sound cannot travel in a vacuum.
- Octopuses have three hearts.
- Light travels at about 299,792 km per second.
- Octopuses have three hearts.
- The human brain uses about 20% of the body's energy.

■ Science Facts Book - Page 4

- The Earth is approximately 4.5 billion years old.
- Lightning is hotter than the surface of the sun.
- There are more stars in the universe than grains of sand on Earth.
- Sound cannot travel in a vacuum.
- Sound cannot travel in a vacuum.

■ Science Facts Book - Page 5

- Sound cannot travel in a vacuum.
- Lightning is hotter than the surface of the sun.
- The human brain uses about 20% of the body's energy.
- A day on Venus is longer than its year.
- Lightning is hotter than the surface of the sun.

■ Science Facts Book - Page 6

- The Earth is approximately 4.5 billion years old.
- Light travels at about 299,792 km per second.
- Humans share about 60% of DNA with bananas.
- The human brain uses about 20% of the body's energy.
- Water boils at 100°C at sea level.

■ Science Facts Book - Page 7

- Sound cannot travel in a vacuum.
- Lightning is hotter than the surface of the sun.
- There are more stars in the universe than grains of sand on Earth.
- Water boils at 100°C at sea level.
- The human brain uses about 20% of the body's energy.

■ Science Facts Book - Page 8

- The Earth is approximately 4.5 billion years old.
- Sound cannot travel in a vacuum.
- The Earth is approximately 4.5 billion years old.
- The human brain uses about 20% of the body's energy.
- Light travels at about 299,792 km per second.
